Safety Blanket

100% Natural Wool
Improves Indoor Air Quality

Absorbs Formaldehyde

Wool Facts

- Absorbs Formaldehyde and VOC's
- Non-flammable due to moisture content
- Regulates surrounding humidity
- Provides thermal insulation
- Provides noise insulation
- Inhibits dust mite survival
- 6' wide x 12' long (72 sq. ft.)
- Contains 5 lbs. wool

Directions: Spread out the blanket and place out in the open area of any room. The wool absorbs the formaldehyde that is off-gassing from carpet, particle board and fiberglass insulation. Exposing the maximum amount of surface area of the blanket will be most effective to absorb formaldehyde in the air. The blanket can be cut into pieces to be strategically placed in cabinets, drawers, closets and furniture.

Washing: Blanket does not require washing. However if you decide to do so use cold water and air dry. Shrinkage of up to 5% may occur. Blanket may become slightly thicker and may fuzz. Machine drying is not recommended.
